Re: Snapper Creek Lakes Community Center
Property: 11190 Snapper Creek Lakes Road
File No.: 11L-123

Dear Mr. Riel:

My office is representing Snapper Creek Lakes, Inc. in its request for Site Plan Approval and a Zoning Code Site Specific Text Amendment to allow for the replacement of its building at 11190 Snapper Creek Lakes Road. The existing one story structure built in 1959 needs upgrading to meet current life safety codes and ADA requirements. The Snapper Creek Lakes Homeowners' Association wants to demolish and replace the building.

The proposed building will be approximately in the same location and have a comparable footprint to the existing structure. A second story is being proposed to provide the Homeowners Association a meeting room and storage for architectural plans of homes built in the Snapper Creek Lakes community.

The uses of the new building will not change. Attached to this letter, as part of our application, is the proposed Site Specific Text Amendment that sets forth the zoning requests for the proposed building and that documents the ongoing operations.

Should you have any questions or need additional documentation, please do not hesitate to call.

Sincerely,

Laura L. Russo

January 1, 2013

Dear Snapper Creek Members:

Season's greetings and a Happy New Year!

As a reminder, the Coral Gables Planning and Zoning Department has sent out a letter notifying all of our neighbors of a January 9th hearing regarding the new SCLC Community Center. For your convenience we have attached renderings of the East and West elevations of the proposed building and we encourage you to stop by the marina to see the full set of plans.

For the purpose of keeping the community involved in the planning process we have discussed the new building at the last two Annual Meetings and in most of the meeting minutes dating from November 2010. We were able to present the conceptual renderings at the Annual Meeting last year and the plans have since been on display at the marina office.

As indicated in the financial statements for the past two years the Club and the Marina have the money to build the new building. For the past four years $60k annually has been allocated to the marina escrow account with a current balance of $240k and the Club has an additional $900k in cash for a total of $1,140,000. The preliminary cost estimate was discussed at the Annual Meeting last year and the building was estimated to cost between $600k to $800k. Due to mandatory changes from the Coral Gables Board of Architects the estimated building price has increased by approximately ten percent which after the changes creates a more attractive building.

The primary reason for a new building is to replace the current building which is in dire need of replacement. The Community Center building has been designed as a two story structure to enhance the usefulness of the facility. The marina facility doubles as the Club Administrative office and also houses all the historical documents of SCLC since its inception. The new building will provide the office and storage facilities for the club and marina business as well as an upgrade to more of a community center atmosphere. As we have discussed at our annual meetings, we are limited to the present building footprint of about 1900 sq ft. To incorporate the functionality of the new building it has been designed with an open (non air conditioned) first floor including boat storage and an air conditioned office / meeting room second floor.

The first floor was designed to keep the important revenue stream from the covered boat storage while adding a covered open air "breezeway". The breezeway will share space with the vending items and tables and chairs for socializing. All ADA requirements will be met making the marina more easily accessible to all that choose to visit. The marina and club administration office will be on the second floor allowing marina personnel a birds-eye view of the marina and a secure area for important documents. In addition to the office, there will be a meeting room with a service area. The meeting room will be open to residents for community gatherings at the Community Center and also for monthly board meetings, various committee meetings, as well as the SCLC Annual Meeting.

The marina will continue to operate as it currently does selling soda, ice, fuel and frozen bait. The redesign includes a major improvement which will allow the larger trailered boats to more easily pass by the building preventing contact with the building.

In total, the new Community Center will be approximately 3900 sq ft with basically the entire downstairs open (non air conditioned) for boat storage and a public gathering area. We believe that the new building will be more consistent with the current architecture of Snapper Creek.

Following the approval of the Coral Gables Planning and Zoning Department on January 9th, we will be sending the plans out for bids. There will be no less than three bids and the entire Board will be involved in the approval and hiring of the contractor.

If you have any questions, please feel free to contact any of your Board Members.

Yours truly,

Your Board

July 31, 2012

The City of Coral Gables:

This letter confirms the awareness of the Snapper Creek Lakes owners with respect to the construction of a new replacement community center. The plan to build the new facility has been communicated as follows:

- Discussed at the annual meeting in March 2011.
- Discussed at the annual meeting in March 2012.
- Discussed in the Board meeting minutes for 2011 and 2012. Minutes are distributed to property owners.
- Annual financial statement for 2011 indicates the funds being accumulated are for the purpose of building the facility.
- The construction of the new building has been approved by the Board of Directors subject to final bids for the project. Sufficient funds have been accumulated to pay for the building per preliminary construction estimates.

Please direct any questions regarding this process to Mr. Lou Risi or Mr. Bill Tillett.

Sincerely,

Lou Risi
President

To: 'Myra Ruiz'
Subject: Snapper Creek Marina
Attachments: Ruiz no oppose.pdf

Hello Myra,

I am writing you today to ask if you and John would sign the attached letter stating that you have no opposition to a new Community Center to be built in the footprint of what is the now dock office. I showed the plans to John a few months ago and he did not indicate any dissatisfaction with the layout or design of this building. I welcome you to come and see the plans that are on display in the dock office.

This letter is not required for the permitting of the building but would probably ease the process if the direct neighbor of the marina is not opposed.

Please let me know if you or John have any concerns about the letter or the building.

Many thanks,
Heather

Hello Myra,

I hope that you and your family had a wonderful Christmas and are looking forward to a fantastic New Year! I am writing to you today to see if you or John would be willing to sign a letter of no opposition regarding the new Community Center building. As you are probably aware the hearing is scheduled for January 9th and it could be a benefit showing that our neighbors do not oppose. We have received the same letter as attached from Steve and Liz Risi who live across from the marina.

If you have any questions or wish to discuss the plans I am always available on my cell phone at 305-970-8702.

Warm regards,

Heather Quinlan

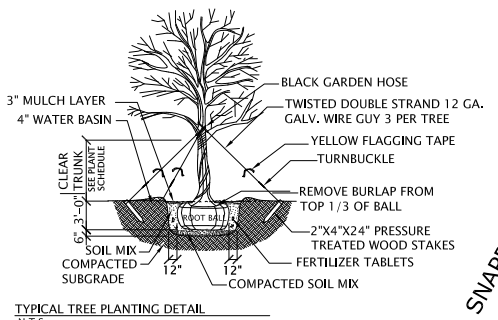
TYPICAL TOP VIEW STAKING DETAIL
N.T.S.



TYPICAL TREE PLANTING DETAIL
N.T.S.

PRELIMINARY LANDSCAPE NOTES

01. Non Cypress variety mulch shall extend under all trees, shrubs and ground cover beds to the closest hard edge or sod border, in a minimum of 3" depth. Red colored mulch will not be acceptable.
02. All plants shall meet the minimum standard of Fancy as specified in Grade and Standards for Nursery Plants as published by the Division of Plant Industry, Florida Department of Agriculture, latest edition.
03. All trees and palms over 8' in height shall be braced to prevent lateral movement for a period of six months from the date of planting. Either wood braces as shown in the planting detail, or the wire and turnbuckle method shall be used. No nails, screws, metal straps or wires are to be used directly against the trees or palms trunks.
04. All work by the Landscape Contractor shall be performed in a professional and sound manner in accordance with established standards of landscape installation practices and workmanship.
05. Landscape Contractor and his subcontractors shall be licensed and insured as required by the municipality, county, state or any other governmental agency requiring a license or insurance in order for the Landscape Contractor to perform his work.
06. All work shall conform to the City of Coral Gables landscape ordinance and any other municipal landscape ordinance in effect at the project's location.
07. Landscape material shall not be allowed to grow in such a manner as to impede street front triangle of visibility to property owner or neighbors, so as to materially impede vision between a height of 2.5 feet and 8 feet.
08. Landscape contractor shall call Sunshine State One Call Center of Florida at 1-800-432-4770 (Toll Free) 48 hours before digging.
09. Should Landscape Contractor find any discrepancies, unavailability of material or any question regarding the adherence to this plan, no decision shall be taken without specific consultation with the Landscape Architect, including substitutions when required.
10. All areas not planted with shrubs or ground covers or specified to be another landscape material such as mulch, bark, stones, etc... is to be covered with sod, inclusive of areas in the RIGHT OF WAY between edge of city or community pavement or curb and property line and/or sidewalks.
11. Landscape Contractor shall estimate the areas specified in decorative stones or gravels, including a min. 2" layer of the stones or gravels and place them over geotextile. Finished level to be minimum 2 inches bellow any adjacent hardscape area.
12. No person other than Landscape Architect who prepared this plan can make any changes or revisions to this plan either electronically or any marking or writing instruments.

LANDSCAPE NOTES

1). Non Cypress variety mulch shall extend under all trees, shrubs and ground cover beds to the closest hard edge or sod border, in a minimum of 3" depth. Red colored mulch will not be acceptable.
2). All plants shall meet the minimum standard of Florida No. 1 or better as specified in Grade and Standards for Nursery Plants as published by the Division of Plant Industry, Florida Department of Agriculture, latest edition.
3). All shrubs to be planted a minimum of 24", and ground covers a minimum of 12" from the edge of any hardscape (walks, building walls, pond's edge, etc...) Shrubs such as Ixora, Raphiolepsis and other species which grow larger than 48" spread, shall be planted at 1/2 the estimated adult's spread diameter from the edges of any hardscape.
4). All trees and palms over 8' in height shall be braced to prevent lateral movement for a period of six months from the date of planting. Either wood braces as shown in the planting detail, or the wire and turnbuckle method shall be used. No nails, screws, metal straps or wires are to be used directly against the trees or palms trunks.
5). All work by the Landscape Contractor shall be performed in a professional and sound manner in accordance with established standards of landscape installation practices and workmanship.
6). Landscape Contractor is responsible for verifying plant quantities prior to bidding. Quantities shown in the plans may vary due to actual site scale, job conditions etc... Landscape Architect assumes no responsibility for the actual plant count necessary for the successful completion of the work.
7). Landscape Contractor and his subcontractors shall be licensed and insured as required by the municipality, county, state or any other governmental agency requiring a license or insurance in order for the Landscape Contractor to perform his work.
8). All work shall conform to the City of Coral Gables and Miami-Dade County landscape ordinance and any other municipal landscape ordinance in effect at the project's location.
9). Landscape Contractor is required to procure and obtain any necessary permits applicable for the sucessful completion of this project, if applicable.
10). Landscape material shall not be allowed to grow in such a manner as to impede street front triangle of visibility to property owner or neighbors, so as to materially impede vision between a height of 2.5 feet and 8 feet.
11). Landscape contractor shall call Sunshine State One Call Center of Florida at 1-800-432-4770 (Toll Free) 48 hours before digging.
12). Landscape Contractor is responsible for inspecting the site and physically observing all the site conditions prior to entering into Agreement or Contract with Owner. Landscape Contractor shall coordinate his work with the General Contractor or Construction Manager in such a manner as to allow for a speedy and orderly completion of all work on the site, and special attention to location of all underground wires, pipes, footings, etc...
13). Any excess soil, landscape materials and debris from the Landscape Contractor's work shall be removed from the site immediately upon completion of his works.
14). Should Landscape Contractor find any discrepancies, unavailability of material or any question regarding the adherence to this plan, no decision shall be taken without specific consultation with the Landscape Architect, including substitutions when required.
15). No person other than Landscape Architect who prepared this plan can make any changes or revisions to this plan either electronically or any marking or writing instruments.
16. Landscape contractor shall create saucers and/or berms on all plant material to hold irrigation water. In the event that slopes are present, landscape contractor shall prepare water holding berms with temporary wood planks or stones which shall be removed and hauled away from the site at the end of the plant establishment periods.
17. Landscape contractor shall provide hand watering to all plant material four times a week for the first week and three times a week for the following three weeks. Twice a week after the fourth week for a period of three months which will be considered the plant establishment period. At the end of the plant establishment period, landscape contractor shall replace any plant material in doubt of survival and remove all temporary wood planks or stones used to create the temporary water holding berms and haul the material away from the site.
