Summary of Opportunities Available

(Alternative 2 provides for additional options and includes all opportunities provided in Alternative 1).

Please note with the following Options 12 – 15, staff has provided photographs of trucks size ranges (from small to large) to provide a visualization truck width, height length and weight. Following the photographs, within Tables 7 –10, staff has provided a listing of all truck widths, heights, lengths and gross vehicle weight from all manufacturers. For comparison purposes, the same information is provided for SUV's within Tables 11 -13. This data includes all trucks and SUV's manufactured within the past ten (10) years.

12. Option 12 – Vehicle Height. Regulate vehicles that exceed a manufacturer's specified height in excess of seventy-two (72) inches. The seventy-two (72) is consistent with the allowable wall height around single family residences. See the below Table 2 for ranges and Table 7 for a listing of trucks by height:

Table 2 – Vehicle Height Ranges*

Type of Vehicle	Minimum Height	Maximum Height
Passenger vehicle	44"	65"
Sport utility vehicle	62"	79"
Pick-up truck	62"	80"

*Approximate measurement to top of vehicle.

13. Option 13 – Vehicle Width. Regulate vehicles that exceed a specified width. Staff suggests this means of measurement is not necessary. Other prohibitions are available if measurement of vehicle size is appropriate. See the below Table 3 for ranges and Table 8 for a listing of trucks by width:

Table 3 - Vehicle Width Ranges

Type of Vehicle	Minimum Width	Maximum Width
Passenger vehicle	61"	78"
Sport/Crossover utility vehicle	67"	101"
Pick-up truck	68"	96"

14. Option 14 – Vehicle Length. Regulate vehicles that exceed a manufacturer's specified length of two-hundred-and twenty eight (228) inches or nineteen (19) feet which is the standard length of a parking space in the Zoning Code. See the below Table 4 for vehicle length ranges and Table 9 for a listing of lengths. See Table 6 for a comparison of vehicle lengths and vehicle heights.

Table 4 - Vehicle Length Ranges

Type of Vehicle	Minimum Length	Maximum Length
Passenger vehicle	106"	243"
Sport/Crossover utility vehicle	153"	226"
Pick-up truck	188"	263"

15. Option 15 – Gross Vehicle Weight. . Regulate vehicles in excess of a specified gross vehicle weight. Staff suggests this type of measurement has no specific correlation to size. Vehicles that may be small in size may have a high gross vehicle weight and vice versa. See the below Table 5 for ranges and Table 10 for a listing of weights:

Table 5 - Vehicle Gross Weight Ranges

Type of Vehicle	Minimum Weight	Maximum Weight
Sport/Crossover utility vehicle	3814 lbs.	10300 lbs.
Pick-up truck	4200 lbs.	13300 lbs.
