SHOWING OF COMPLIANCE WITH CRITERIA FOR SITE SEPARATION**

Re: Property: 1248 Coral Way, Coral Gables, Florida 33134
Applicant: 1248 Coral Way, LLC

Dear Mr. Riel:

As of Friday, January 20, 2012, 1248 Coral Way, LLC ("Applicant") is the fee owner of 1248 Coral Way (the "Property"). This will provide a description and history of the Property, provide the Applicant's statement of use/intent for the Property, and show compliance with the criteria for Site Separation as set forth in the City of Coral Gables Zoning Code.

Property Description

The Property is a full 35,000 square feet that is comprised of two (2) 17,500 square feet sections, each 100' x 175' ("Lot" or "Lots"). Currently, the Property has a single address, but each Lot has a separate folio number and the Lots have never been subject to a unity of title. The Applicant obtained each Lot by separate Warranty Deed, copies of which are attached. Each Lot is described as follows:

1. Folio Number 03-4118-002-0030, having a legal description of lots 5 & 6, Block 1, Coral Gables Section D Revised Plat, as recorded in Plat Book 25, at page 74 of the Public Records of Miami-Dade County, Florida. Said property is 100' x 175' and includes a 7

bedroom, 6 bath Historic Home; and,

2. Folio Number 03-4118-002-0031, having a legal description of lots 7 & 8, Block 1, Coral Gables Section D Revised Plat, as recorded in Plat Book 25, at page 74 of the Public Records of Miami-Dade County, Florida. Said property is 100' x 175' and is unimproved ("Unimproved Lot").

Historically, the two Lots were never intended to be a single building site, and have never been a single property. Rather, the home was constructed in 1929 on one Lot and purchased by the Davidson family in 1939. However, the adjacent Unimproved Lot was acquired by the Davidson family more than ten (10) years later, in about 1940. At an unknown date, a wall was built at the front of the Property along Coral Way but the walls are not continuous or attached. There is a space of about ½" separating the walls at the property line of the Property. Also, the wall on the east side of the Unimproved Lot belongs to the neighbor at 1232 Coral Way and, thus, is not a part of, or connected to, the front wall of the Unimproved Lot. Various photographs of the walls reflecting the foregoing are attached for your easy reference.

As of November 17, 2011, the Property as a whole has been designated a Local Historic Landmark by the Historic Preservation Board and is listed on the Coral Gables Register of Historic Places. As such, even before closing on the Property, the Applicant has been working closely with the Historic Preservation Board in an effort to confirm our commitment to fully renovate and preserve the existing historic structures. In turn, the Historic Preservation Board has given its support to the granting of this application for site separation so that an appropriate residence can ultimately be constructed on the Unimproved Lot.

Notwithstanding the foregoing, by letter dated May 12, 2011, the City of Coral Gables, Zoning Department issued a determination that the Property is a single building site.

Statement of Use/Intent

The Applicant now seeks to return the Property to its original state as two (2) separate building sites. The Applicant intends to restore and improve the existing historic home and to construct an appropriate single family home on the Unimproved Lot.

Showing of Compliance with Applicable Code for Site Separation

Consideration of the Applicant's request for site separation requires an initial showing that the Property and its intended use satisfy 4 of the 6 criteria set forth in Article 3-206 (F) of the City of Coral Gables Zoning Code. This Applicant will show that the Property and its intended use satisfy 5 of the 6 criteria. The criteria and bases for satisfaction are as follows.

- 1. That exceptional or unusual circumstances exist, that are site specific such as unusual site configuration or partially platted lots, or are code specific such as properties having two (2) or more zoning and/or land use designations, multiple facings or through-block sites, which would warrant the separation or establishment of a building site(s).**

Compliance: The Property and this request for site separation are unique because the requested separation is, in reality, a request to restore the Property to its original condition as two (2) building sites. Because the Property originally was two (2) separate building sites, the Property, in its current state with only one home on one side of the Property is not consistent with the rest of the neighborhood. In fact, this request for site separation would more appropriately be entitled a request to restore the Property to its original use. The Property is also unique in that there has never been a unity of title, the Lots have always been separately taxed (two folio numbers), no structures have ever been built on the Unimproved Land, and the wall which appears to cross the front of the Property has never been a single wall but rather is separated at the property line where the improved Lot meets the Unimproved Lot.

- 2. That the building site(s) created would be equal to or larger than the majority of the existing building site frontages of the same zoning designation within a minimum of one thousand (1,000) foot radius of the perimeter of the subject property or extending no farther than the immediate vicinity, whichever is less. "Immediate vicinity" shall be defined as an area in which a parcel of land is located, that is physically, functionally or geographically identifiable as a distinct realm, place or neighborhood, or an area within a radius of not more than one-half (1/2) mile from the subject property, whichever is smaller.**

Compliance: The two (2) proposed building sites each have a frontage of one hundred feet (100') along Coral Way which is equal to or larger than most of those properties in the immediate vicinity of the Property, along Coral Way between Columbus and Alhambra Circle. A list showing the frontages of all properties within the radius grouped by frontage size is attached. More specifically, 194 out of 238 such properties, or more than eighty one percent (81%), have 100' frontages or less, and the properties immediately adjacent to and across from The Property all have 100' frontages. Accordingly, the two (2) building sites created would be equal to or larger than the majority of existing building sites in the same zoning designation within a 1000' radius of the Property. A certified search of the properties within a 1000' radius of the Property is attached, along with a colorized radius map.

- 3. That the building site(s) separated or established would not result in any existing structures becoming non-conforming as it relates to setbacks, lot area, lot width and depth, ground coverage and other applicable provisions of the Zoning Code, CP and City Code. The voluntary demolition of a**

building which eliminates any of the conditions identified in this criterion shall not constitute or result in compliance with this criterion.

Compliance: The two (2) proposed building sites would not result in any existing structures becoming nonconforming as it relates to setbacks, lot area, lot width and depth, ground coverage and other applicable provisions of the Zoning Code, Comprehensive Land Use Plan, and City Code. One proposed building site which consists of Lots 5 and 6 and includes the existing residence complies with the Zoning Code as it relates to building setbacks, lot area, lot coverage and building height. No structures will be altered or removed to comply with City ordinances. The second proposed building site which consists of Lots 7 and 8 is the Unimproved Lot. Accordingly, criteria number 3 is satisfied. Please see the attached letter from architect Pedro Bravo who has been retained to develop plans for the restoration of the existing historic home and for a new single family home on the Unimproved Lot.

4. **That no restrictive covenants, encroachments, easements, or the like exist which would prevent the separation of the site. The voluntary demolition of a building which eliminates any of the conditions identified in this criterion shall not constitute or result in compliance with this criterion.**

Compliance: There are no are no restrictive covenants, encroachments, easements or the like that exist which would prevent the separation of the site. No existing buildings will be voluntarily demolished. Architect Pedro Bravo has researched public documents and met with various representatives of the City of Coral Gables and has confirmed that this criteria number 4 is satisfied. Please see the attached letter from architect Pedro Bravo.

5. **That the proposed building site(s) maintains and preserves open space, promotes neighborhood compatibility, preserves historic character, maintains property values and enhances visual attractiveness of the area.**

Compliance: This application clearly maintains and preserves open space. As previously stated, the proposed site separation will restore the Property to its original state as two (2) separate building sites, and will restore and resurrect the historic character of the entire Property. The proposed building sites will improve the appearance of the neighborhood by making the Property consistent with the building sites in the area and the neighboring properties. Both the existing historic residence, restored and improved, on one Lot, and a new, single family home of appropriate style, size and consistent with the guidelines of the Historic Preservation Board on the Unimproved Lot, will only serve to enhance property values and the visual attractiveness of the area. Criteria number 5 is clearly satisfied.

6. **That the building site(s) created was purchased as a separate building(s) site(s) by the current owner prior to September 17, 1977.**

Compliance: Although the Applicant cannot technically satisfy Criteria number 6 because the property was recently purchased, the criteria was satisfied by the prior owner and is satisfied in spirit. That is, the prior owner (and his parents before him) owned the Property from 1939 through 2010. Mr. Davidson, the prior owner, and his family purchased the Lots separately and always maintained them as separate Lots.

Based upon the foregoing, this application meets five (5) of the six (6) criteria. Pursuant to the Zoning Code, staff should recommend approval of this application.

Thank you for your consideration. Please let us know if you have any questions or if you require any additional materials regarding these criteria.

Sincerely,

Re : 1248 Coral Way
Site Separation Application

Dear Mr. Riel and Mr. Carlson,

As part of the Site Separation request, our office has conducted a study to comply with criteria number 3 and number 4 of the application. Criteria number 3 states:

That the building site(s) separated or established would not result in any existing structures becoming non-conforming as it relates to setback, lot area, lot width and depth, ground coverage and other applicable provisions of the Zoning Code, CP and City Code. The voluntary demolition of a building which eliminates any of the conditions identified in this criterion shall not constitute or result in compliance with this section.

Lots 5 and 6 which include the existing residence, comply with the Zoning Code with regard to building setbacks, lot area, lot coverage and building height. No structures will be altered or removed to comply with City ordinances. Lots 7 and 8 are unimproved. Criteria #3: *Satisfied.*

Criteria number 4 states:

That no restrictive covenants, encroachments, easements, or the like exist which will prevent the separation of the site. The voluntary demolition of a building which eliminates any of the conditions identified in this criterion shall not constitute or result in compliance with this section.

After researching public documents and meeting with City personnel, there are no restrictive covenants, encroachments, easements or the like tied to any of the subject properties. Criteria #4: *Satisfied.*

Should you have any questions or require additional information, please contact our the office.

Sincerely,

- V. THE FLOOR SPACE IN ANY GARAGE AND/OR GARAGE STORAGE AREA SHALL BE COMPUTED AT THREE-QUARTERS (3/4) OF FLOOR AREA FOR ONE (1) STORY DETACHED GARAGES LOCATED IN THE REAR YARD AREA WITH A HEIGHT THAT DOES NOT EXCEED SIXTEEN (16) FEET ABOVE ESTABLISHED GRADE AND A FLOOR AREA THAT DOES NOT EXCEED THREE-HUNDRED-AND-FIFTY (350) SQUARE FEET.

The proposed expanded structure on lots 5 & 6 will have a floor area of:
Ground floor A/C area = 2,300 s.f.
Garage area = 626 s.f.
Second Floor A/C = 3,293 s.f.
Total area = 6,219 s.f.

The proposed floor area for lots 7 & 8 will comply with the floor area limitations.

1 1. DETERMINATION OF MAXIMUM SQUARE FOOT FLOOR AREA IN FLOOD HAZARD DISTRICTS.

N/A

1 2. GARAGE FAÇADES.

A GARAGE THAT FACES UPON A STREET SHALL NOT EXCEED ONE-THIRD (1/3) OF THE WIDTH OF THE FAÇADE OF THE RESIDENCE THAT FACES UPON A STREET AND THE REMAINING TWO-THIRD (2/3) OF THE FAÇADE SHALL NOT INCLUDE OTHER GARAGE AREAS OR DETACHED GARAGES VISIBLE FROM THE FRONT OF THE STREET. IN THE EVENT A BUILDING SITE HAS LESS THAN FIFTY (50) FEET OF STREET FRONTAGE OR DOES NOT HAVE SUFFICIENT DEPTH ON A SIDE STREET TO PROVIDE A GARAGE, THEN A ONE (1) CAR GARAGE WITH A MAXIMUM INTERIOR DIMENSION OF TWELVE (12) FEET BY TWENTY-FIVE (25) FEET DEEP SHALL BE PERMITTED TO FACE UPON THE FRONT STREET.

For lots 5 & 6 the proposed garage will face the street for 15% of the lot width. In addition, the existing garage structure is setback from the street 135'.

Lots 7 & 8 will comply with this limitation.

1 3. CARPORT CANOPIES ARE PROHIBITED IN SFR ZONING DISTRICTS.

EXISTING CARPORT CANOPIES IN SFR ZONING DISTRICTS SHALL BE CONSIDERED AS NONCONFORMING AND ARE SUBJECT TO THE PROVISIONS IN ARTICLE 6.

Dear Mr. Admire:

Please be advised after careful research and study of our records and the information provided the Building and Zoning Department made the following determination:

Lots 5 and 6, Blk 1 Coral Gables Section "D" also known as 1248 Coral Way cannot be considered a separate building site from lots 7 and 8, Blk 1 Coral Gables Section "D" due the following reasons:

1. Several building permits were used indicating and including lots 5 thru 8 specifically building permits Nos.:
20471 (lots 5 thru 8) addition,
6247 (lots 5, 6, 7) Sprinkler System
2. The following improvements are reflected on the survey provided; concrete block fence walls at the rear and front of the subject property which occupy the site, lots 5 thru 8 and tie the site together.

Section 3-206 (D) of the "Zoning Code" states: "In the event that an application for a building site determination is denied by the Development Review Official or any change is proposed for the purpose of creating a new building site, the application shall submit an application for conditional use approval, together with a proposed site plan, and such application shall be reviewed in accordance with the procedures established in Article 3, Division 4 of these regulations and the applicable standards in subsection F."

Any change from the foregoing may only be made upon a demonstration of a change in the material facts upon which this determination is made by the City Commission after the matter has first been heard at a public hearing for an establishment of a building site before the Planning and Zoning Board.

Please be advised that this determination does not constitute a development order. If you have any further questions in this matter, please do not hesitate to contact this office.

Re: Local Historic Designation of **1248 Coral Way**, legally described as Lots 5 & 6 and Lots 7 & 8, Block 1, Coral Gables Section "D" Rev., PB 25-74

Dear Ms. Alonso:

This letter is to confirm the decision of the Historic Preservation Board meeting of Thursday, November 17, 2011. The Board met to review a request for Local Historic Designation of the property located at 1248 Coral Way.

The Historic Preservation Board deemed it a historic landmark, listing it on the Coral Gables Register of Historic Places. As a result, any plans for modifications to this property should first be submitted to the Historical Resources Department for review. A copy of the Board's resolution will be forwarded as soon as it is available.

We have also enclosed for your information a copy of Ordinance No. 3027, concerning Tax Exemptions for Historic Properties and information on how to order the ceramic "landmark" plaque in the event you wish to purchase one. Please note that tax exemption does not result solely from historic designation and requests for Ad Valorem Tax Relief must receive preliminary approval prior to the onset of construction.

Please also note that there is a ten day appeal period. Any aggrieved party may appeal any decision of the Historic Preservation Board to the City Commission by filing a written Notice of Appeal and the applicable appeal fee with the City Clerk within ten (10) days from the date of the decision. The notice shall concisely set forth the decision appealed and the grounds for the appeal. If any person decides to appeal any decision made with respect to any matter considered at this public meeting or hearing, the aggrieved party will need a record of the proceedings. For such purpose the aggrieved party may need to ensure that a verbatim record of the proceedings is made, which record includes the testimony and evidence upon which the appeal is based.

Site Characteristics: The property is located on four interior lots on the south side of Coral Way, between Indian Mound Trail and Madrid Street. The primary elevation faces north onto Coral Way. Dimensions of the site are 200 feet wide by 175 feet deep.

SUMMARY STATEMENT OF SIGNIFICANCE

Constructed in 1929, the residence at 1248 Coral Way is one of several homes that were designed by architects Wade and Oemler (Lee L. Wade and C. H. Oemler) and constructed by Ambrose F. Becker. Designed in the Mediterranean Revival style, this residence is an excellent example of the type architecture that predominated Coral Gables in the 1920s.

CRITERIA FOR SIGNIFICANCE

a. *Historical, cultural significance:*

1. *Is associated in a significant way with the life or activities of a major historic person important in the past.*

b. *Architectural significance:*

1. *Portrays the environment in an era of history characterized by one (1) or more distinctive architectural style;*
2. *Embodies those distinguishing characteristics of an architectural style, or period, or method of construction;*

In 1929, permit number 4214 was issued for the construction of the two-story Mediterranean Revival style residence at 1248 Coral Way. The front (north) façade, is the most decorative and is centered on an predominant entrance tower. Cast stone and stucco mouldings surround the gently arched front door and arched casement window above. To the west of the entry on the first floor are a pair of arched casement windows flanking a cast stone decorative column with a sill (originally with a wrought iron railing) below. Above these windows, on the second floor is a single large casement window with a decorative balconette with a wrought iron railing. To the east of the entry are a pair of arched casement windows (originally French doors) flanking a cast stone decorative column. A pair of casements with a sill are above. Further to the east is a one-story open car port detailed with: arched openings, a decorative wing wall, iron grille and true barrel tile shed roof.

The remainder of the house exhibits facades that are simpler in nature and are defined by arched and rectangular casement windows with simple sills. The two exceptions to this simplicity are a wood balcony on the second floor of the west façade and a curvilinear stair hall that creates a secondary tower feature on the east façade.

In plan, the front door enters into the living room which is anchored by a large fireplace to the east. The first floor plan consists of a variety of spaces that include: a "living porch," dining room, pantry, kitchen, screened rear porch and "maid's room," two bathrooms, and a service hall that leads to a guest bedroom. Also shown on the first floor plan is a large rear patio enclosed with a decorative low wall at the southeast corner of the residence.

The second floor consists of a master bedroom with a sitting room (a later addition) to the east, two additional bedrooms, two bathrooms, closets, and an additional sitting room to the south (another later addition).

A two-story auxiliary structure is to the south of the existing residence. Simply decorated, the auxiliary structure takes its cues from the architecture of the residence and exhibits casement windows (without sills), a flat roof with a parapet and wooden garage doors. The original plans indicate that the first floor consists of a two-car garage and a laundry room. The second floor is an apartment with two bedroom that share one bathroom.

The original permit and site plan indicate that the property originally consisted only of Lots 5 and 6. Lots 7 and 8 were purchased in 1940. The original site plan shows the concrete driveway

in the same configuration as exists today with a wide loop at the rear of the property. The earliest photo of the residence shows a low perimeter wall with decorative elements at the entry points and wrought iron gates. The stuccoed concrete wall extends around the entire property. Also added, at an unknown time, was a roofed structure in the loop of the driveway behind the house. It is a simple structure with rough-hewn timber elements that support a true barrel tile roof and provides coverage for a well constructed out of coral rock (oolitic limestone).

ADDITIONS / ALTERATIONS

There have been few substantive changes to the structure at 1248 Coral Way over the years other than what would be considered routine maintenance (painting, re-roofing, roof repairs, etc.). Air-conditioning was introduced and an irrigation system was also installed on the property.

The following permits were also issued for the property:

Permit #5948 issued June 14, 1939, Architect: William H. Merriam.

Alterations to the existing one-story garage included: the addition of a first floor laundry room, new second floor two-bedroom apartment and an exterior stair.

Permit #19395B issued March 20, 1967, Architect: Wray G. Succop.

An addition and alterations to the existing structure included: the addition of a new second-floor sitting room on the east side of the house at the location of an existing balcony, the addition of wood shutters and the addition of stucco panels on the front façade to convert the first-floor French doors into windows.

Permit #20471B issued March 20, 1969, Architect: Wray G. Succop.

Proposed additions and alterations to the existing structure included the addition of a second-story sitting room over an existing one-story element at the rear (south) of house and a two-story connector between the existing house and the existing garage. The connector, called a "bridge" in the plans, consisted of an open-air arched loggia at the first floor and an enclosed, flat-roofed hallway above. The connector was omitted from the permit and not constructed. Only the sitting room was completed.

ARCHITECT

The residence was designed by the architectural firm of Wade and Oemler. The principals of the firm were Lee L. Wade and C.H. (or C.J.) Oemler. Little is known of Mr. Oemler at this time.

Lee L. Wade, architect, worked in Coral Gables from 1925 to about 1938. He became a member of the American Institute of Architects in 1926. He designed many Mediterranean Revival style residences and commercial buildings including the original Weiland Clinic (now the site of Books and Books) located at 263-265 Aragon Avenue. His architectural office was located in the Chaplin Building at 2302 Ponce de Leon Boulevard (downtown Coral Gables).

BUILDER

Constructed by Mr. Ambrose F. Becker, this house possesses strong associations with Coral Gables during the years after the Florida land boom. Ambrose Becker was born in New York City in the 1880s. His family members were some of the early settlers in New York. Starting his career as an investment banker in New York, his attention turned to real estate and in 1918, he formed the Laurelton Development Company and the Hawthorne Homes Construction Company with partner Harold G. Aron. The firm was involved with development and construction in the Greater New York City Area.

In 1924, Becker moved to Florida. During the Boom years he was very active in real estate and formed a number of different companies with associates that included: The Miami Realty and Trust Company, The Delbeck Realty Company, The Meyerbeck Company and the Ambeck Company. After the "bust" in 1926, Becker's interest in Florida, particularly Coral Gables, never waned. He began a campaign to revive interest in Coral Gables and started an aggressive building campaign in the late 1920s and early 1930s. Through his individual efforts Becker was able to convince many prominent families to relocate to Coral Gables. Listed individually in the History of Dade County, Florida written by Tracy Hollingsworth in 1949, Ambrose Becker is described as follows:

The late George Merrick publicly stated that if he (Merrick) were responsible for the foundation of "Coral Gables," Ambrose Becker deserved equal praise in its rebirth. For he (Becker) poured his energy, time and money into the Gables at the time when everyone else was willing to believe it dead and let it so remain. It took courage and faith in the future during those days. But he was well endowed.

The property at 1248 Coral Way is one of five properties permitted in succession by Ambrose Becker with Wade and Oemler listed as the architect of four of those properties.

Daniel Huntley Redfearn (1884-1963) and his wife Susan were the first residents of the property at 1248 Coral Way. Daniel H. Redfearn was born May 4, 1884 in Thomas County, Georgia. He attended the University of Georgia where he was awarded a literary degree in 1909 and a law degree in 1910. According to University of Georgia legend, when Redfearn arrived on campus in the early 1900s, he vowed that he would not walk under the University's wrought iron "Arch" (a University landmark and part of the University's official logo) until he had a diploma in hand. Redfearn kept his vow. When University professor learned of his promise and announced it to his classes, a tradition began at the University of Georgia among the freshman classes that still holds to this day. Redfearn even stipulated in his will that \$1,000 be allocated toward the maintenance of "The Arch."

Redfearn went on to do post-graduate work at Columbia University and the University of Michigan and practiced law in Albany, Georgia from 1910 to 1925. On November 20, 1913, he married Susan Ellis Fort. In 1925, he moved his practice to Miami, Florida. Redfearn is the author of a number of law books on wills and estates that are still being published today. He was also President of the Dade County Bar Association and the President of the Florida State Bar Association. Additionally Redfearn was an amateur astronomer and the compiler of Redfearn genealogy, publishing History of the Redfearn Family in 1942. He and Susan had one son, Robert Huntley Redfearn, born on September 11, 1926. Daniel Huntley Redfearn died in 1963.
